“Commitment”

ENGINES

Lycoming & Continental

For pilots, mechanics and everyone else interested in aviation the great issue is engines and their performance. Obviously, as with everything else in this world, you get what you pay for. Don't expect high cost service at a low cost spent.

Initial savings in overhaul cost often lead to a frustrating experience when paying for a costly repair while the engine only is at mid-life. Chances are, you will be spending even more.

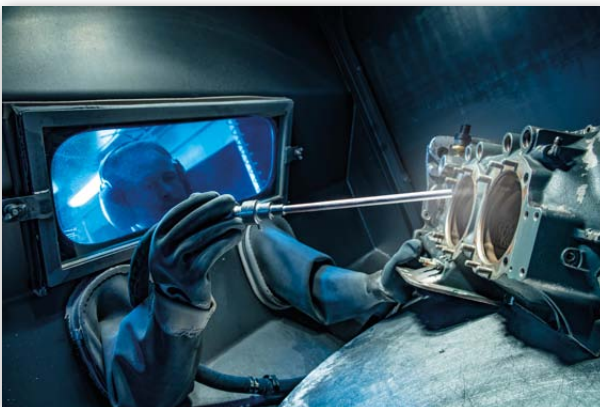

At ScanAviation we believe in quality overhauls and not just an overhaul that barely meets the minimum requirements of the engine manufacturer. We change all parts that are critical to safety and best performance. Not only that: We change all parts that we know can lead to operational difficulties long before TBO:

Subject	ScanAviation standard
Cylinder assemblies	Factory New
Camshafts	Factory New
Lifters	Factory New

And many other NEW parts.

And what if the unexpected happens: In case warranty is void, do you still have a partner to call, discuss your problem, obtain a solution or even visit with you personally and solve your problem? Yes you do: We go the extra step to keep you flying instead of crying.

Talk to us next time you are ready for an engine overhaul. We are engine and aviation professionals and our engines are tested and certified to the highest standards.
